Sidstation Resurrected!

Against all odds we did it! 100 factory new SID 6581 chips was secured by Elektron, allowing for a brief return of the highly sought after Sidstation synthesizer. At least for a short while the unique SID sound can find its way to new daring musicians.

The new batch of Sidstations is built exactly like the previous ones. All original parts have been hunted down to assure the original sound. They are all manufactured in Sweden by the original company.

That's it for now
The Elektron Team
