45 Tribute Announced

After the tragic passing of Elektron co-founder Daniel Hansson, a compilation of music featuring the instruments he helped creating has seen the light of day.

»45 – A tribute to Daniel Hansson« features unreleased tracks from 30 artists, some of them very well known to the public. The compilation is an initiative coming completely from the Elektron-users web community and we at Elektron are very moved by this. We really have the best user base one can imagine.

All the proceeds from the compilation will go directly to the World Wildlife Foundation as environmental causes were close to Daniel's heart.

A big thanks goes out to all the artists who submitted tracks - but maybe most of all to Ryan Faubion. He is the one who made the compilation possible. Thank you!
